VIDEO GAMES

I authorize the processing of the personal data contained in my curriculum vitae in accordance with Italian Legislative Decree 196/2003, as coordinated with Legislative Decree 101/2018, and with EU Regulation 2016/679 (GDPR).

ABOUT ME

I'm someone who loves travelling and discovering new places: every new place is a chance to learn something, and I bring that same curiosity into the way I work. I like to stay up to date on everything related to the tech world so I can keep pace with new trends, and in my free time I play tennis, which helps me stay focused and think clearly about what to do. I've been a scout for as long as I can remember, and for the past five years I've held a role of responsibility for around 30 children aged 8 to 11. Day to day, I'm a Web Developer: I've been working remotely for 5 years on projects that have broadened my skill set and improved my sense of responsibility and autonomy. I chose this job because I love finding practical, efficient and effective solutions — an approach that lets me offer clients the best possible outcome.

WHERE I'VE WORKED

Middle Web Developer — LOUD Agency

2021 – Present · Remote

- Responsible for the design and development of corporate and e-commerce websites, from front-end to back-end integration, supporting clients with UX/UI consulting and ensuring intuitive, efficient and effective interfaces
- Technical point of contact for custom web application development, helping clients identify the optimal technical solution for the project and taking full responsibility for the entire project lifecycle, ensuring agreed deadlines are met
- Responsible for the ongoing maintenance and evolution of the entire company portfolio (70+ projects), with decision-making autonomy over stability, security and performance, keeping the infrastructure efficient over time
- Direct management of landing pages and DEMs for clients, guiding them towards the most effective graphic and technical solution for the project, with attention to loading performance
- Design and development of reusable templates for the Pharma sector, taking responsibility for the entire production process and reducing development time by 60%

Junior Developer — Positive Purchasing LTD

09/19 – 12/19 · Plymouth (UK)

- Co-responsible for managing the client portfolio, with direct oversight of the maintenance and updating of company websites
- Customisation and development of e-learning websites with efficient and functional solutions
- Creation and management of online training courses, ensuring a quality production process

MY METHOD

01 OBSERVE

I analyse the project's context, requirements and constraints before proposing any solution, so as not to lose sight of the bigger picture.

02 DEDUCE

I identify causes and priorities, weighing technical alternatives based on impact, timing and long-term sustainability.

03 SHARE

I discuss the identified solution with the team, gathering feedback to validate its soundness before sharing it with the client.

04 ACT

Implementation of the best solution, monitoring results through to release.
